

CampusEAI Consortium Case Study: Louisiana State University myCampus Portal

Since its beginnings in 1860, Louisiana State University's history has been a story of growth and transformation. As the flagship institution for the state, LSU has long been recognized for a rich intellectual environment and distinctive educational programs that are rooted in the unique culture, history and geography of Louisiana. LSU is committed to excellence at every level, offering a challenging academic and research environment in one of the most unique cultural settings in the nation. Louisiana State University Selects CampusEAI Consortium's myCampus portal to provide single sign-on to critical applications

Challenge

Louisiana State University (LSU) required a web solution that would enhance traffic and time spent on its website while also providing online interaction and collaboration in the Web 2.0 style to which students are now accustomed. A solution to provide easy to update content and information access was also essential.

Additionally, LSU had difficulty managing the multiple login credentials required for its critical enterprise applications, including their LSU-developed enterprise resource planning system, Moodle®, Google® Mail Service and Microsoft® Exchange®. LSU needed a single sign-on solution that would allow students, faculty and staff to use one set of credentials across all critical systems.

Solution

LSU implemented CampusEAI's myCampus Portal platform, which provides a space for active, engaged student and faculty participation, single sign-on for all critical campus systems and a space specifically designed for easy content creation and dissemination.

Results

Using myCampus, LSU has been able to provide its students, faculty and staff with a suite of features that promote online collaboration and participation, both in and outside the classroom.

LSU has also been able to utilize the myCampus Portal to consolidate its enterprise applications, requiring only a single set of credentials across all critical systems and providing an easy one-stop destination for all its major systems.
